## **Cover Letter-Modular Approval**

FCC ID: YZP-BK1100 Date: Oct. 10, 2017

## Gentlemen:

There's a <u>Telematics Modem</u> that would like to have your authorization as a modular approval. The specific product as below, <u>Telematics Modem</u> with its designed features and specified description, meets special requirements for <u>Full modular approval</u> on FCC KDB996369 by cross-reference list below.

| Company      | LG Innotek Co., Ltd. |
|--------------|----------------------|
| Model Name   | Telematics Modem     |
| Model Number | LTD-BK1100           |
| FCC ID       | YZP-BK1100           |

| Requirement of FCC KDB996369 |  | Comply (Y/N)                                   |  |  |
|------------------------------|--|--|--|--|
| 1.                           | The modular transmitter must have its            | Y  |  |  |
|                              | own RF shielding.                                | The EUT provides the RF shielding. See EUT     |  |  |
|                              |  | photo.   |  |  |
| 2.                           | The modular transmitter must have buffered       | Y  |  |  |
|                              | modulation/data inputs (if such inputs are       | The EUT has its buffered modulation. Please    |  |  |
|                              | provided) to ensure that the module will         | see the Schematic Diagram.                     |  |  |
|                              | comply with Part 15 requirements under           | č  |  |  |
|                              | conditions of excessive data rates or            |  |  |  |
|                              | over-modulation.                                 |  |  |  |
| 3.                           | The modular transmitter must have its            | Y  |  |  |
|                              | own power supply regulation.                     | The EUT has its own power supply               |  |  |
|                              |  | regulation, please see the Schematic Diagram.  |  |  |
| 4.                           | The modular transmitter must comply with the     | Υ  |  |  |
|                              | antenna and transmission system requirements     | The EUT meets the FCC antenna                  |  |  |
|                              | of Sections 15.203, 15.204(b) and 15.204(c).     | requirements; unique antenna connector and     |  |  |
|                              | The antenna must either be permanently           | photo of antenna are shown in the test report. |  |  |
|                              | attached or employ a "unique" antenna coupler    | photo of unterma are shown in the test report. |  |  |
|                              | (at all connections between the module and the   |  |  |  |
|                              | antenna, including the cable). The               |  |  |  |
|                              | "professional installation" provision of Section |  |  |  |
|                              | 15.203 is not applicable to modules but can      |  |  |  |
|                              | apply to limited modular approvals under         |  |  |  |
|                              | paragraph (b) of this section.                   |  |  |  |
| 5.                           | The modular transmitter must be tested           | Y  |  |  |
| ]                            | in a stand -calofiguration, i.e., the            | The EUT was tested with a test board, Please   |  |  |
|                              | module must not be inside another                | see test report and setup photo                |  |  |
|                              | device during testing.                           | see test report and setup photo                |  |  |
|                              | device during testing.                           |  |  |  |

- 6. The modular transmitter must be labeled with its own FCC ID number, and, if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: YZP-BK1100" or "Contains FCC ID: YZP-BK1100" Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization.
- Please see exhibition label sample for the FCC ID of this module. And also in the exhibition Users manual, there are instructions give to the OEM on how to label the end product.

7. The modular transmitter must comply with any specific rule or operating requirements applicable to the transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements. A copy of these instructions must be included in the application for equipment authorization.

The EUT is compliant with all applicable FCC rules. Details instructions for maintaining compliance are give in the User Manual.

8. The modular transmitter must comply with any applicable RF exposure requirements. For example, FCC Rules in Sections 2.1091, 2.1093 and specific Sections of Part 15, including 15.319(i), 15.407(f), 15.253(f) and 15.255(g), require that Unlicensed PCS, UNII and millimeter wave devices perform routine environmental evaluation for RF Exposure to demonstrate compliance. In addition, spread spectrum transmitters operating under Section 15.247 are required to address RF Exposure compliance in accordance with Section 15.247(b)(4).

Y
The EUT complies with RF exposure requirement.

| Thank you. Sincerely,                             |               |  |  |  |
